

# Extend Your Search Within and Beyond Aras Innovator® with a9 AppConnect

Alcove9 is an advanced, on-premise search engine for engineering and manufacturing enterprises of all sizes and industries.

It helps users to quickly find and view parts and related product data that exist in all of the enterprise's application systems and document files – with countless content formats.

Alcove9 uses a single point-of-access to all part data maintained in file structures and application systems, such as PDM, PLM, ERP and ECM. Users can search and retrieve the desired content without knowing in which applications or repositories it resides.

Like Alcove9, Aras Innovator is based on an open source framework. The Aras Enterprise Application Framework is an advanced, model-based, service-oriented architecture (SOA) built entirely on open Web standards and proven, industry-standard technology that provides a highly scalable, robust, flexible platform for PLM.

**Ideal for a variety of diverse environments:**

- Small organizations and teams
- Large companies
- Single site and dispersed teams

## Features

- Maintains all properties and files and are fully accessible via the user-friendly Alcove9 interface
- Displays property details on Alcove9's Virtual Profile Card
- Identifies relationships and structures for analysis
  - Visualizes documents and drawings
  - Allows choice of searching methods
  - Provides Full Text searching
  - Enables user customization

## Benefits

**a9 AppConnect for Aras Innovator** helps companies to reduce new product development time and costs, thus accelerating time-to-market.

1. Saves time (and therefore, money) by instantaneously finding required data
2. Increases quality of decisions by having ALL the data needed to make informed decisions
3. Eliminates costs and risks of design reconstruction because prior information couldn't be found
4. Avoids costly repurposing (or migrating) of existing data
5. Encourages collaboration

## Servers

- Windows™ 32-bit: 2003 and XP
- Windows™ 64-bit: 2003 x64 and XP x64
- Windows™ 7 64-BIT

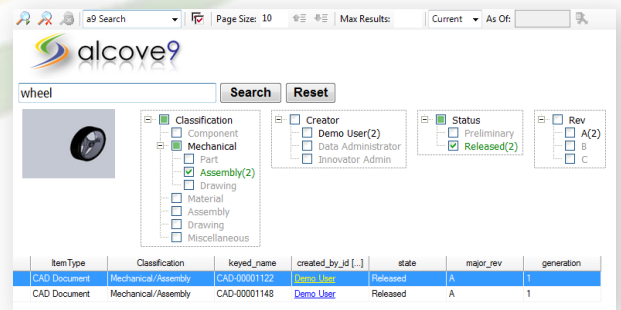

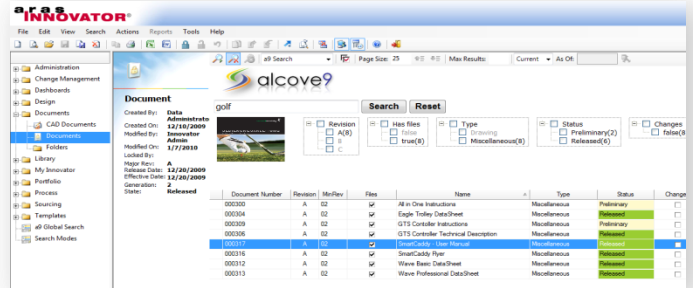

## Clients

Most browsers are supported, including:

- Internet Explorer
- Firefox
- Chrome
- Safari
- Mobile devices

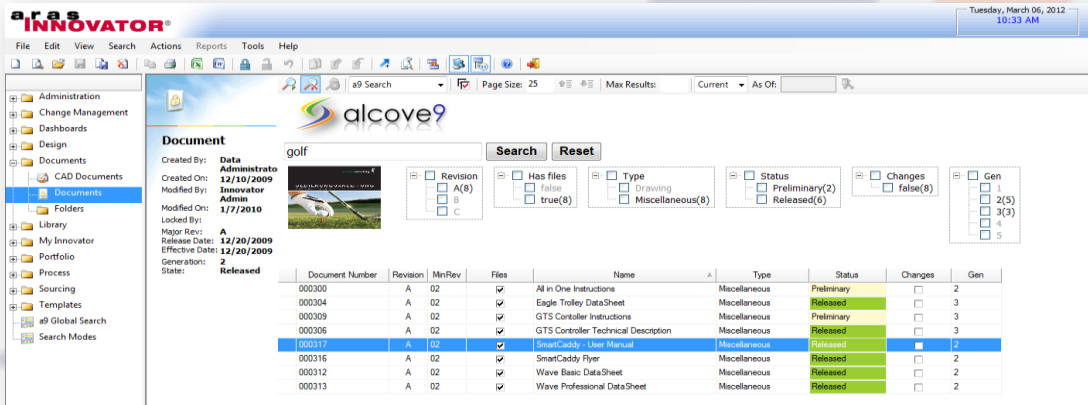

## Security

- Alcove9 inherits security settings set by native conditions and existing Access Control Lists
- Compatible with various single sign-on solutions

## Support and Subscription

Alcove9 products are offered on an annual subscription basis. Subscription pricing is based on an a-la-carte selection of only those components that you need. For more details regarding pricing structure, please fill out the Contact Us form at [www.alcove9.com](http://www.alcove9.com).
